Subject to slight alterations as the season advances, but good varieties of equal number will be substituted.

COOLING'S HYACINTHS FOR OUT-DOOR CULTIVATION.**Select Single Bedding Hyacinths in Distinct Shades of Colour.**

THE great advantage from using these over the usual mixture is that each colour will consist of the same variety, and consequently, instead of flowering at different periods and of various heights, the entire bed or border will open together, thus ensuring uniform and equal effect.

Single Dark Blue , by name ... per 100, 17/6; per doz. 2/6	Single Rose , by name ... per 100, 17/6; per doz. 2/6
— Light Blue " " 17/6; " 2/6	— Pure White, by name " 20/-; " 3/-

Bulbs most suitable for growing in Fibre are Roman and Miniature Hyacinths, Daffodils, Polyanthus Narcissus, Jonquils, Scillas, &c.

DAFFODILS OR NARCISSUS

form that a most interesting exhibition can be made of Narcissi alone. They thrive best in a cool moist situation, and when once fairly planted should be left undisturbed for years. In the following List are included the best varieties, from which a selection may be made which will produce a continuous succession of bloom from February to June. Many of the varieties are suitable for growing in pots and for forcing, and make charming plants for Conservatory and Room decoration.

NARCISSUS FOR POTS AND COMPETITION.

100 Picked Bulbs in 10 choicest named varieties	8/6
Including Empress, Madame Plem, Emperor, Irish King, Bicolor Victoria, M. J. Berkeley, and other beautiful varieties.

		SOLEIL D'OR, yellow, orange cup per 100, 8/6	1 3
		Mixed, various shades	5/- 1 0

CHINESE SACRED NARCISSUS (Joss Flower or Flower of the Gods).

The Chinese Emblem of Good Luck, as it is called by the Chinese, is a variety of Polyanthus Narcissus grown by the Celestials to herald the advent of their New Year and as a symbol of good luck.—6d. each; 5s. per dozen.

Expected to arrive early in October.

JONQUILS

Highly prized for their delicate fragrance, graceful habit of growth, and profusion of bloom. They are invaluable for pot culture, but being perfectly hardy may be planted in the open borders, and are exceedingly useful for cutting for bouquets.

	Per 100 s. d.	Per doz. s. d.		Per 100 s. d.	Per doz. s. d.

7 in. 2/; 8 in. 2/3; 9 in. 2/6; 10 in. 3/.

SPECIAL BULB FIBRE COMPOST, very clean to use and always keeps sweet, peck bag 1/; bushel 3/6.

TULIPS

Planted in beds, or grouped in large or small masses in the borders, the brilliancy of the display of Tulips is unsurpassed by any bedding plants. The best time for out-door planting is from October to the middle of November, each bulb being placed 4 to 6 inches deep and about the same apart. A rich light sandy soil is the most suitable, and where this cannot be had a sprinkling of sand should be put under each bulb—this ensures good drainage, and prevents the bulbs rotting from too much moisture. When grown in pots Tulips are treated in the same manner as the Hyacinth, but several bulbs may be placed in a pot. When required to fill epergnes and baskets it is a good plan to grow them in shallow boxes, and transfer them when in flower to the vases or baskets.

For the assistance of Customers who require beds of one colour to flower simultaneously, we have placed after each name a number indicating the order of flowering. Thus—Number (1) is the earliest; the others following at about a week's interval.

The best large-flowering Single Tulips for early forcing are Maes, scarlet; Mon Tresor, yellow; Joost van Vondel, white; and Proserpine, silky rose; these with gentle forcing may be had in bloom from Christmas.

Parrot Tulips.

The Parrot or Dragon Tulips have immense attractive flowers of singular and picturesque form and brilliant and varied colours. The petals are curiously fringed or cut. They make extravagantly showy flower beds, are of endless variety of form and colour, and should be grown by way of contrast with other varieties.

Florist Tulips.

The flowers are very large, symmetrically formed, and their magnificent colours, with interesting and delicate featherings and markings, make them extremely attractive. It is for sorts of this genus that in the seventeenth century such unheard of sums were paid.

BIZARRE TULIPS.—Grand rich flowers of perfect shape, having yellow ground colour, feathered or striped with crimson, purple, or white. Choice Mixed, per 100, 3/6; per doz. 6d.

VIOLET BYBLÆMEN TULIPS.—Blotched, striped, or feathered with blue, lilac, violet, purple, or black on white ground. Choice Mixed, per 100, 4/; per doz. 9d.

ROSE BYBLÆMEN TULIPS.—Magnificent flowers, perfect form, white ground, with markings of crimson, pink, scarlet, or rose. Choice Mixed, per 100, 4/; per doz. 9d.

REMBRANDT TULIPS.—Remarkable variety of the tall May-Flowering Tulips, flowers are beautifully striped and feathered, very attractive for beds or borders.

100 Selected Bulbs in 10 Named Varieties 12/6
Choice Mixture, containing many beautiful varieties per 100, 8/6; per doz. 1/3

We recommend Couronne d'Or (yellow), Murillo (blush), and Imperator Rubrorum (crimson), as the best varieties of Double Tulips for forcing.

May & Various Late Flowering Tulips.

The various late flowering Tulips, including the Darwin and the many beautiful Tulip species, have come much to the front lately, and have been the centre of attraction at some of the May Shows of the Royal Horticultural and other Societies. The extreme beauty of the many late flowering Tulips is unquestionable; whether grown in the regular beds in the flower garden or planted in clumps in the herbaceous border or pleasure grounds they are equally attractive, and as the majority of the varieties are tall and sturdy in growth, producing their flowers upon long stems, they are most useful for cutting for vases when the forced flowers are almost over.

Darwin Tulips.

This most beautiful strain of tall stately-growing late-flowering Tulips have been so largely exhibited and greatly admired this season for their globular form and beauty of colouring. When planted in clumps or masses there is nothing more attractive, and for cut flowers their long stems and varied colours are unsurpassed, and lasting as they do such a long time in water makes them most valuable.

ANEMONES

The Anemone ranks amongst the oldest of garden flowers, and certainly amongst the most beautiful. Perfectly hardy and simple of culture, it is characterised by great variation in the colour, character, and marking of the flowers. The most suitable time for planting is towards the end of October; if in beds, four to six inches apart, and if in borders, in clumps of four to six roots. Plant about two inches deep.

DOUBLE ANEMONES.

We call special attention to the low price of Iris Reticulata, the gem of the early flowering bulbs.

LILIUMS

There is no class of flowers so universally admired as Lilies, and whilst they are numbered among the most beautiful, they are likewise a class of the hardiest and most easily grown, and no garden can be considered complete without a good collection. In whatever state the soil is, it is advisable when planting to have a handful or two of clean sharp sand placed around them for preserving the bulbs from excess of damp in Winter. **POT CULTURE**—As soon as the bulbs are received pot them, one in a 6-inch pot, or two or three in an 8-inch pot. Do not let the soil come within two inches of the rim of the pot. Place in a cold frame, and give water sparingly till growth appears. As the shoots increase give more liberal supplies, and when all danger of frost is past remove to a sheltered but light situation in the open air. About the beginning of July fill up the pots to within an inch of the rim with well-rotted manure. As soon as the buds are fairly developed afford the plants the protection of a glass roof or other shelter. *The varieties marked * are the most suitable for pot culture.*

Each—s. d.				Each—s. d.			
*AURATUM. The <i>Golden Rayed Lily of Japan</i> , undoubtedly the finest of the tribe, flowers 6 to 8 inches across. Ivory white ground, spotted more or less with crimson, and having a band of yellow or crimson running along the centre of each petal; of powerful and delicious perfume.				*KRAMERII. —FLORE PLENO. Flowers blood crimson, very handsome, semi-double, 1½ ft., p. doz. 7/6 0 9				PARDALINUM. Bright scarlet, spotted maroon, very hardy, will do in any good garden soil, recommended for shady situations, 3 ft., doz. 5/ 0 6			
—ORANGE QUEEN. A grand Lily of recent introduction, the flowers being very large, of a beautiful bright orange colour with dark spots, 1½ ft. 2 0				Pomponium vernum. Bright liery scarlet, not unlike the old <i>Scarlet Martagon</i> , one of the earliest and most distinct of all Lilies, per doz. 7/6 0 9			
Giganteum (<i>The King of Lilies</i>). A stately growing Lily, producing noble flower stems 6 to 8 feet high, from which depend trumpet-shaped white flowers streaked with violet and crimson, very fragrant 3/6, 5/6, and 7 6				Rubellum. Beautiful new early flowering Lily from Japan; colour bright pink or rosy blush, beautifully perfumed, can be grown in the open border 1 0			
*HARRISII (<i>The Bermuda Easter Lily</i>). The great value of this Lily is its very free-flowering qualities. The flowers are trumpet-shaped, tube six to seven inches long and of good substance, colour of purest white, and very fragrant, 3 ft. Selected Roots per doz. 9/- 1 0				*Sulphureum , a splendid Lily, of easy cultivation, growing from 4 to 6 ft., with immense creamy yellow trumpet-shaped sweet-scented flowers, 9 in. long, and of great substance ... 2/6 to 3 6			
Extra Large Roots, scarce 15/- 1 6				*Szovitzianum or <i>Colchicum</i> . This is the handsomest of all the yellow Lilies, very fragrant, flowers ranging in colour from pale primrose to deep golden yellow, more or less studded with purplish black spots, petals elegantly recurved. Strong flowering roots per doz. 10/6 1 0			
*HENRYII. A new variety from China, described as the yellow <i>Speciosum</i> , colour apricot yellow, with numerous brownish red spots, very free ... 2 6				Testaceum. Flowers large, soft apricot colour, produced 6 to 12 on a spike, will grow in any soil 1 6			
Humboldtii. A remarkably fine variety, attaining a height of about 5 ft., produces freely fine large flowers of golden yellow spotted purple ... 2 0				TIGRINUM FL. PL. (<i>Double Tiger Lily</i>). A plant of stately habit, bearing an immense number of very double bright orange red flowers spotted with black, 4 to 6 ft., 100, 14/6; doz. 2/ 0 3			
				—SPLENDENS. Bright fiery orange scarlet, a much improved variety of the common single <i>Tiger Lily</i> , 4 ft. ... per 100, 10/6; per doz. 1/6 0 3			
				Umbellatum (or <i>Davuricum</i>). Flowers erect or cup-shaped. Very showy, deep orange or orange crimson, freely spotted with black, 2 to 3 feet, doz. 2/6 0 3			
				Washingtonianum. Magnificent species from California, producing 15 to 20 flowers on a stem. The flowers are long in the tube, with widely expanded mouths. Pure white with scarlet spots 2 6			

Lilium Brownii, *Kramerii*, and *Rubellum*, easy of cultivation, and of lovely soft delicate colours; should be grown by all.

CROCUS

This is one of the most beautiful of our common early blooming spring flowers. Although well known and a general favourite, it is seldom we find it planted to the extent its easy culture and great effect entitle it to. Plant during September, October, and November, 3 inches deep and 2 inches apart, in lines, clumps, or masses.

CROCUS SPECIES.

Those who have not seen the Autumn Meadow Saffrons in bloom would hardly conceive how beautiful they are. In September, October, and November, just as the summer flowers are dying off, they throw up their masses of Crocus-like flowers, covering the ground with a sheet of blossom, and as the leaves do not appear till spring, at a little distance the effect is peculiar, there being nothing but colour.

THE CRIMEAN SNOWDROP (<i>Galanthus Plicatus</i>).—A grand variety, 12 to 15 in. high, bears very large flowers. —Per doz. 2/-; per 100, 15/.	

THE GIANT SNOWDROP (<i>Galanthus Elwesii</i>).—The largest of all Snowdrops; a grand species which should be grown in every garden. Extra size roots.—Per doz. 6d.; per 100, 3/6; per 1000, 30/.
— Good flowering roots.—Per doz. 4d; per 100, 2/6; per 1000, 22/6.

SNOWFLAKES

The Spring Snowflake blooms about a month later than the Snowdrop, bearing its flowers on stalks 4 to 6 inches high. The Summer Snowflake is much taller and more vigorous. It blooms early in June. The flowers are produced in clusters of 4 to 8 blooms on a stem more than a foot long, and have the tips of the petals marked with green inside and outside.

Autumnale, graceful in pots or rockwork, flowers white shaded pink, requires a sandy soil, 4 in. per doz. 1/6	Spring Snowflake (<i>Leucojum Vernum</i>), flowers white with green tips, 6 in. ... per 100, 4/6; per doz. 9d.
Summer Snowflake (<i>Leucojum Æstivum</i>), drooping white flowers in May, 1½ feet, per 100, 4/6; per doz. 9d.	Leucojum Vernum Carpathicum, a beautiful new Spring Snowflake, taller and larger in the flower than the ordinary variety ... per 100, 4/6; per doz. 9d.

The named varieties of Crocus are far superior to the border kind, producing larger flowers and much more floriferous.

MUSCARI (Hyacinthus)

sweet-scented Musk Hyacinth. They are well adapted either for pot or border culture, and may be treated as recommended for Hyacinths.

Azureus, Cambridge blue, flowering in February, per 100, 5/; per doz. 9d.
 — **Amphibolus**, a giant flowering variety, bearing spikes 8 inches high, well above the foliage; very free flowering ... per 100, 5/; per doz. 9d.
Botryoides (*Grape Hyacinth*) ,, 1/6; ,, 3d.

A class of pretty spring flowering Bulbs, among which specially meriting attention are the Feathered Hyacinth, with its large handsome feathery flowers; the Grape Hyacinth, with its flower bells compactly set together; and the favourite

Botryoides alba, snow white, very pretty 100, 2/6; doz. 6d.
Heavenly Blue, charming soft colour of Gentian blue, sweet-scented; valuable for cutting. Home-grown roots, extra large ... per 100, 5/; doz. 9d.
Plumosus (*Feather Hyacinth*) ,, 3/6; ,, 6d.
Racemosum (*Starck Hyacinth*) ,, 3/6; ,, 6d.

GLADIOLUS NANUS

These almost rival the *Ixias* in their rich colourings and choice variety; they are much hardier, and will be found most attractive either for pot culture or when planted in clumps. They flower from June to August, and have only to be better known to be more extensively grown and appreciated. All last a long time in water, and on this account they are invaluable for cut flowers.

Mixed varieties ... per doz. 1s. 6d.

ACONITE (Winter).—The earliest spring flower. Clear yellow colour, and contrast admirably with the glossy dark green fingered leaf rosettes in which they nestle.—Per doz. 4d.; per 100, 2s.; per 1000, 17s. 6d.

AGAPANTHUS UMBELLATUS.—The *Great African Lily*, though commonly treated as a greenhouse plant, will succeed well in a south aspect in the open air, and well grown plants make noble ornaments in pots or tubs on lawns, terraces, or piazzas.

Umbellatus, clear blue, strong plants ... each 1s.

Umbellatus albus, pure white ... each 1s. 6d.

ALSTROEMERIA (*Peruvian Lilies*).—Beautiful large Lily-like flowers borne in clusters, colours crimson, rose, yellow, purple, &c., shaded and marked. They are splendid for cutting, being of good substance and lasting in perfection a long time.

Chilensis, fine mixed ... per 100, 6/6; per doz. 1s.

ALLIUM.—Exceedingly pretty Spring flowering bulbs, most suitable for clumps in the mixed borders or rock-work.

Acuminatum, deep rose, 1 ft. ... per doz. 2s. 6d.

Azureum, deep blue, 2 ft. ... per doz. 2s.

Molly, bright yellow, 1 ft. per 100, 1s. 6d.; ,, 4d.

Neapolitan, pure white, largely grown for cut flowers, per 100, 2s. 6d.; per doz. 6d.

Roseum, pale pink ... per 100, 4s. 6d.; per doz. 9d.

AMARYLLIS.

Belladonna (*The Belladonna Lily*), doz. 5s.; each 6d.

Formosissima (*The Jacobean Lily*), per doz. 4s.; ,, 6d.

Longiflora alba (*Crinum*), pure white, hardy each 6d.

Lutea (*Sternbergia Lutea*), golden yellow ... doz. 1s.

Powellii (*Crinum*), rose-coloured flowers, extra large, hardy ... each 1s.

Vallota Purpurea (*The Scarborough Lily*), each 9d. & 1s.

Sarniensis (*The Guernsey Lily*) ... each 9d.

Vittata, mixed seedling ... each 1s. 6d. and 2s. 6d.

ANOMATHECA CRUENTA.—Similar in foliage and habit to the *Freesia*, flowers bright scarlet with deep blotches; an admirable pot plant, flowering in May.—

Per doz. 6d.; per 100, 3s. 6d.

Gladiolus Nanus are not so extensively grown as they deserve; their delicate colouring and lasting qualities in the cut state make them indispensable for cut flowers.

BABIANAS.—The flowers are large, showy, and of the most intense and beautiful colours. Resembles Sparaxis in habit, but foliage covered with greyish down.

Choice Mixed... .. per 100, 7s.; per doz. 1s.

BEGONIAS.—Splendid collection of best and largest flowered varieties.

Dormant Bulbs, Single Varieties, choice hybrids, in distinct colours per doz. 3s. 6d.

— The same in Mixture per doz. 3s.

— Superior, selected for pot culture, doz. 6s. to 9s.

Dormant Bulbs, Double Varieties, choice hybrids, to colour per doz. 4s. 6d.

— The same in mixture per doz. 4s.

— Superior, selected for pot culture, doz. 9s. to 12s.

CALOCHORTUS (*The Butterfly Tulip*).—Charming Californian bulbs flowering out of doors in June and July, or under glass in a cool greenhouse. They are of the richest and most brilliant colours, and are rapidly becoming most popular.

6 Beautiful Varieties to name, distinct, 3 bulbs each, 5s. 6d.

Choice Mixed Varieties per doz. 2s. 6d.

CANNAS.—Beautiful and distinct hardy cool greenhouse and sub-tropical plants which have become very popular, and have been much improved of late years. We offer a splendid strain with bold foliage and large flowers.

Choice Varieties, 6s. to 12s. per doz.

CROWN IMPERIAL.—One of those old garden favourites that are just now somewhat neglected. A handsome showy plant with bright green foliage and stately crown of pendulous flowers.

Gold Striped, foliage variegated each 8d.

Single Red per doz. 4/6; each 6d.

— Yellow „ 4/6; „ 6d.

Mixed, Imported per doz. 4s.

CYCLAMEN (Hardy).—A beautiful class of hardy plants not so much grown as they deserve. They are of easy culture, and under favourable conditions improve each year; partial shade, a free soil, with limestone (broken mortar rubbish) near the roots, are all they require.

Atkinsii Seedlings, beautiful spring flowering varieties, very free each 4d.; per doz. 3s. 6d.

Coeum, lovely bright crimson with dark base, excellent for rock-work, flowers early in spring, each 6d.; doz. 4s. 6d.

Pyrenaicum odoratum, Autumn flowering, purplish crimson, sweet scented each 4d.; per doz. 3s. 6d.

Hederæfolium (the *Ivy-leaf Cyclamen*), rose-coloured flowers, very free, with pretty marbled and splashed foliage, early autumn flowering ... each 3d.; doz. 2s. 6d.

— **album,** flowers pure white, most ornamental foliage, nearly every plant being different

each 6d.; per doz. 4s.

Repandum, bright crimson, flowering in May, a charming variety; thrives best in a sheltered position

each 4d.; per doz. 3s. 6d.

DOGTTOOTH VIOLETS (Grandiflora).—The flowers droop somewhat like the Cyclamen, and the foliage is deeply spotted with brown, thriving best in a partially shaded and moist situation.

10 Beautiful Distinct Varieties to name, 5 bulbs of each, 5s.

Splendid Mixed per 100, 5s.; per doz. 9d.

FREESIAS.—Plant 5 to 6 bulbs in a 5-inch pot, and cover with a light mulching of moss until growth begins, when water freely and give plenty of sunlight and warmth. The flowers when cut and placed in water keep perfect for two weeks.

Refracta alba, pure white, with small yellow blotch on lower petal; extra large bulbs per doz. 9d.; per 100, 4s. 6d.

— **Purity,** absolutely pure white with immense flowers and stronger foliage, p. doz. 1s.; p. 100, 6s. 6d.

Leichtlini major, large cream-white flowers, blotched orange in throat per doz 9d.; per 100, 5s.

Mixed Hybrids, the strain contains many beautiful colours of violet, rose, and orange, and is indeed a grand addition to our bulbous plants.

Strong Flowering Bulbs, each 9d.; per doz. 7s. 6d.

FRITILLARIA MELEAGRIS.—The flowers are bell-shaped and pendulous, deeply chequered with reddish purple. Quite hardy. Very pretty planted in groups. Equally suited for rockwork or pot culture, requiring a shady position.

10 Beautiful and Distinct Varieties to name, 5 bulbs of each, 5s.

Alba, pure white per doz. 9d.; per 100, 4s. 6d.

Fine Mixed, self coloured and mottled varieties, per doz. 6d.; per 100 3s. 6d.

HYACINTHUS CANDICANS.—A beautiful hardy summer flowering plant, with 3 to 4 feet stems, bearing drooping ivory-white bell-shaped flowers of delicate fragrance. It is very suitable for planting among shrubbery.

Extra Large Bulbs per doz. 1s.

IXIAS.—There are few bulbous plants more beautiful or more useful where cut flowers are required in the months of April and May. Flowers of the most brilliant, rich, and varied hues, valuable either for house decoration or for cut flowers.

100 Bulbs in 10 beautiful varieties, to name, 5s. 6d.

50 do 5 do do 3s.

Choicest Mixed, all colours ... per 100, 3s.; per doz. 6d.

Crateroides, bright scarlet, excellent for forcing, the earliest of all per 100, 5s.; per doz. 9d.

BULB BOWLS.—The Aldwych, shaded brown with wide silvered rim, pictures of coaching scenes,

7 in. 2/; 8 in. 2/3; 9 in. 2/6; 10 in. 3/.

SPECIAL BULB FIBRE COMPOST, very clean to use and always keeps sweet, peck bag 1/; bushel 3/6.

MONTBRETIA.—Beautiful late summer flowering plants, resembling a small *Gladiolus*. They are perfectly hardy and increase rapidly. The flowers are freely produced on branched spikes $2\frac{1}{2}$ feet high, and are very useful as cut blooms for vases, &c.

100 Selected Bulbs in 10 choice varieties, 4s.

California, deep golden yellow, very free flowering
per 100, 4s. 6d.; doz. 9d.

Etoile de Feu (*Star of Fire*), bright vermilion, centre yellow, outside blood red, very floriferous, one of the most beautiful ... per 100, 4s. 6d.; doz. 9d.

George Davidson (*new*), flowers of large size, glistening orange-yellow, well opened, very vigorous in growth, 3 ft. ... per 100, 10/6; per doz. 1s. 6d.

Gerbe d'Or, pure golden yellow per 100, 3s. 6d.; doz. 6d.

Germanica, extra large orange scarlet flowers, 3 to $3\frac{1}{2}$ in. across, produced in great profusion per doz. 1s. 6d.

Lady Hamilton (*new*), yellow shaded apricot, large flower and very free flowering ... each 1s.; per doz. 7s. 6d.

Macrophylla, robust grower of branching habit, flower orange outside, inside yellow, per 100, 3s. 6d.; doz. 6d.

Prometheus (*new*), rich orange with dark crimson spots at the base of the petals; the flowers are larger than those of any other Montbretia; 3 feet
each 1s. 6d.; per doz. 15s.

Speciosa, orange with yellow disc in the centre, very distinct ... per 100, 3s. 6d.; per doz. 6d.

Rosea, bright salmon rose, distinct
per 100, 3s. 6d.; per doz. 6d.

ORNITHOGALUM.—Effective and showy bulbous plants for forcing.

Umbellatum (*Star of Bethlehem*), per 100, 2s. 6d.; doz. 6d.

SAUROMATUM GUTTATUM (Monarch of the East).—Produces out of the dry Bulb without water or soil a beautiful coloured flower spathe 16 to 18 inches long.

Extra Large Bulbs, with cultural directions
each 6d.; doz. 5s. To arrive in October.

SCHIZOSTYLIS COCCINEA.—Brilliant scarlet flowers, having somewhat the appearance of a small *Gladioli*. Quite hardy, easily grown, and gives a goodly supply of bloom in the autumn.—Per doz. 1s.

SOLOMON'S SEAL.—A handsome garden plant with strong stems 2 feet long, with erect leaves and pendent flowers. It has a graceful appearance and shows to great advantage in a shrubbery leaning forward in front of low bushes.—Per doz. 1s. 6d.

SPARAXIS.—Similar in style and habit of growth with the *Ixia* but a little dwarfier.

100 Bulbs in 10 beautiful varieties, to name, 5s. 6d.

50 do 5 do do 3s.

Choice Mixed ... per 100, 2s. 6d.; per doz. 4d.

TIGRIDIAS.—A handsome Autumn flowering plant, with a profusion of remarkable and strikingly beautiful flowers. Their gorgeous colourings look more like the blossoms of some brilliant orchid or inhabitant of the warm stove than the produce of an open air plant. Bulbs ready in November.

Aurea, rich old gold, a perfectly clear flower with small centre, mottled chocolate ... per doz. 1s.

Conchiflora, petals yellow, cup yellow and spotted scarlet
per doz. 1s.

Grandiflora alba, fine white flowers with large brown-red blotch on yellowish ground ... per doz. 1s.

Lilacea, brilliant crimson-magenta with white centre, which is heavily marked with dark chocolate spots
per doz. 1s.

Pavonia, petals scarlet and spotted scarlet, with orange cup ... per doz. 1s.

Rosea, petals pure white, suffused and lined with bright rose towards the edge, centre maroon with dark spots; very attractive and distinct per doz. 1s. 6d.

Fine Mixture of above varieties, per 100, 7s.; doz. 1s.

TRITELEA UNIFLORA.—A perfect little gem for either pot culture or for borders. Each bulb produces several pretty star-shaped flowers one to two inches diameter, of a delicate milky white suffused with blue, and with the perfume of Primroses.—Per 100, 1s. 6d.

TRITONIA.—Attractive graceful plants with drooping ribbon-like leaves and flowers of the most brilliant colours, which continue a long time in bloom.

Crocata, Mixed Varieties ... per 100, 6s.; per doz. 1s.

TUBEROSE.—By successional planting Tuberose may be had in flower during the whole year. The cultivation is simple, requiring merely to be started in a bottom heat. Three or more roots are grown in a pot.

American Double (Pearl Excelsior). The best variety, not being so tall in growth as the others, yet very floriferous, and spreading the same delicious perfume. Ready in December.—Per doz. 1s. 6d.; per 100, 10s.

African, Double. Fine quality. These can be supplied in September as they ripen much sooner than the American, extra large selected roots only.—Per doz. 2s. 6d.; per 100, 17s. 6d.

The Montbretias are of the easiest cultivation, and if allowed to remain for several years they form magnificent clumps, giving a profusion of bloom; the new varieties, George Davidson and Prometheus, are great improvements.

Plants and Roots for Forcing

LILY OF THE VALLEY.

Finest Berlin Pips (arriving about the end of October). Every pip may be depended on to flower well ... per 100, 6/6; per doz. 1/-

Retarded Crowns, suitable for forcing from June to November... per 100, 10/6

Imported Dutch, fine strong clumps for early forcing each 1/; per doz. 10/6

Dutch Pips, for late forcing and outdoor planting per 100, 4/6; per doz. 9d.

FORTINS' NEW LARGE-FLOWERED VARIETY, quite distinct, producing long stiff stems with immense bells, double the size of the ordinary variety; a great acquisition, single crowns. *Fortins'* Lily is not suitable for early forcing, but comes best to character gradually brought into flower in a cool greenhouse or cold frame.

Strong Flowering Roots doz. 2/-; per 100, 12/6

Planting Roots ... per doz. 1/6; per 100, 9/-

Retarded Crowns for immediate forcing per 100, 17/6

DIELYTRA.

A beautiful hardy perennial, blooming in the open border from May to June. By forcing they may be had in bloom early in spring, producing in great abundance their pendent heart-shaped flowers.

Spectabilis, extra strong, imported, for forcing ... each 6d.; per doz. 4/-

SPIRÆA.

AVALANCHE, this fine new *Spiræa* received an Award of Merit at Holland House this year; a strong grower with beautiful snow-white flower spikes of great size and beauty each 1/6; doz. 15/-

QUEEN ALEXANDRA (new) flowers of a delicate pink colour, well above the foliage. Awarded Gold Medal at Holland House Show, each 9d.; per doz. 7/6

PEACH BLOSSOM (new), a companion to the preceding, but of a lighter pink colour, each 9d.; per doz. 7/6

Astilboides floribundus, a large flowering variety, dark green foliage, large pure white plumes; most valuable introduction each 6d.; doz. 5/-

Blondin, excellent for forcing, said to be the best of the many beautiful varieties of *Spiræas* introduced of late years ... each 9d.; per doz. 6/-

Japonica (*Hoteia Japonica*), in clumps, imported, for forcing in pots for early spring bloom ... each 6d.; per doz. 4/-

CHRISTMAS ROSE (Helleborus).

Bath is noted for its fine type of *Helleborus Niger*, and the stock we offer is the true variety.

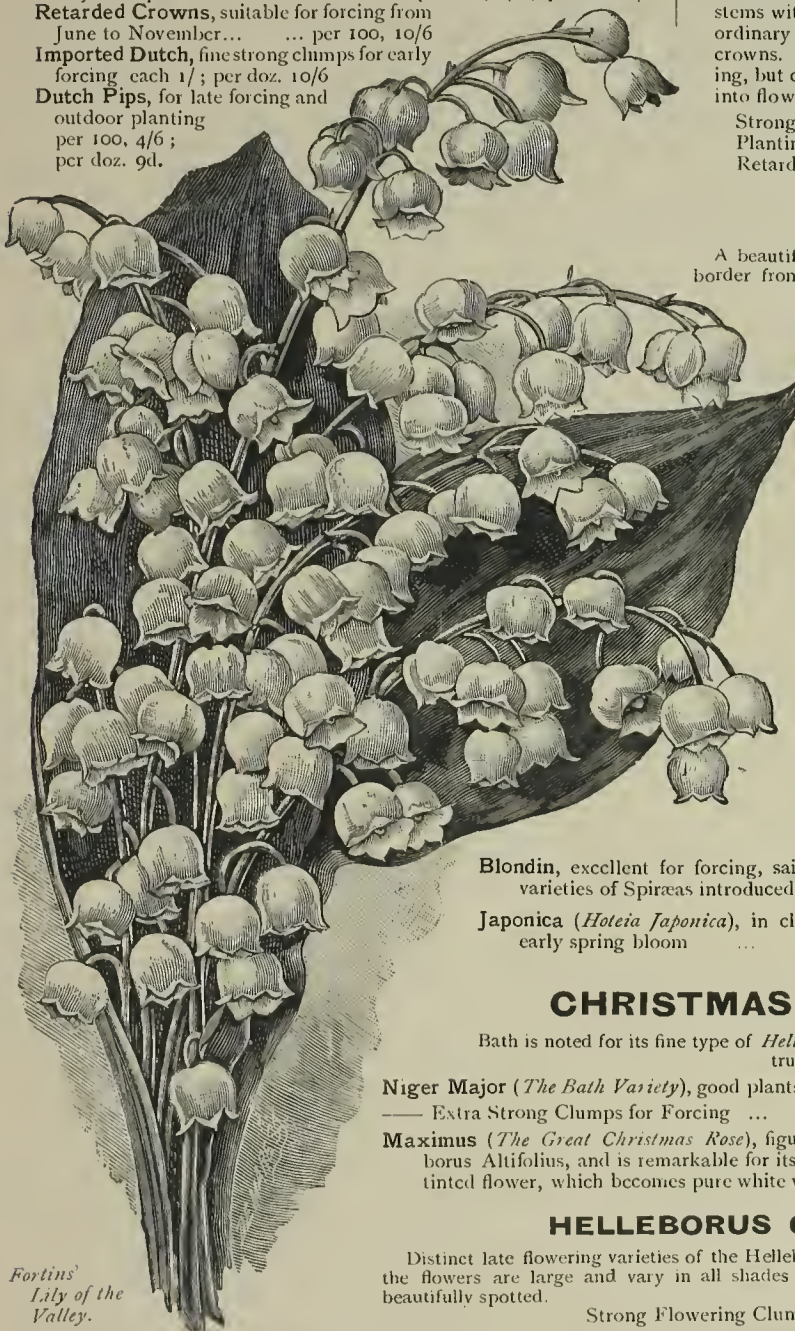

Niger Major (*The Bath Variety*), good plants with buds, each 9d. to 1/; doz. 6/ to 12/-
— Extra Strong Clumps for Forcing ... each 1/6 to 2/; per doz. 15/ to 18/-

Maximus (*The Great Christmas Rose*), figured in the *Garden* under the name *Helleborus Altifolius*, and is remarkable for its dark green leaves and its immense rose tinted flower, which becomes pure white with glass protection each 1/6 and 2/6

HELLEBORUS ORIENTALIS.

Distinct late flowering varieties of the Hellebore, which should be more largely grown; the flowers are large and vary in all shades of rose, purple, and light red, many are beautifully spotted.

Strong Flowering Clumps, 1/ and 1/6 each.

Fortins'
Lily of the
Valley.

New *Spiræas*—Queen Alexandra and Peach Blossom—have been the admiration of everyone wherever exhibited.

Plants for Winter & Spring Flowering in the Greenhouse and Conservatory.

AZALEAS.

Mollis, beautiful shades of colour, from pale lemon to deep orange; the plants are well set with buds each 1/, 1/6, and 2/6; per doz. 10/6, 15/, and 24/-
— Standards, on Stems, with fine heads ... each 3/6
Rustica flore pleno, unquestionably a grand acquisition to the list of plants for forcing. It is of vigorous growth, sets its buds easily, and is a most abundant bloomer, producing flowers in splendid trusses, each 2/6 to 3/6; per doz. 24/ to 36/-
Mollis × **Sinensis**, the colours are more brilliant than those of *Azalea mollis*, the petals are thicker, the flowers are generally larger, and many of the seedlings are beautifully spotted like the flowers of *Rhododendrons*. Bushy plants with 25 to 30 buds ... each 2/6; per doz. 24/-
Pontica (Hardy Ghent), well set with buds, yellow; sweet-scented ... each 1/6 to 2/6; per doz. 15/ and 24/-
— Double Varieties, fine for cutting ... per doz. 24/; each 2/-
Indica. The Indian Azaleas are amongst the most showy and easily flowered of all hardy greenhouse plants. We have a very large collection comprising all the best Continental varieties, fine plants well set with buds, doz. 21/, 24/, and 30/-

BEGONIAS.

Gloire de Lorraine, the free flowering bright pink winter variety ... each 1/; doz. 10/6
Turnford Hall, the pure white winter flowering variety of the above ... each 1/; doz. 10/6

BOUVARDIAS.

Choice Named Varieties, double and single. Many varieties are fragrant, and when plants are well grown they will more or less continue flowering nine months out of the year each 1/6 to 2/6; per doz. 15/- to 24/-

CARNATIONS.

Tree or Perpetual Flowering, grown in pots for Autumn and Winter blooming. A selection of the best varieties, full of buds ... per doz. 12/ to 30/-
Malmaison Varieties ... per doz. from 9/-

CAMELLIAS.

All clean healthy vigorous plants specially grown for winter flowering, and well set with buds ... each 2/6 to 3/6

CYCLAMEN.

Persicum giganteum, choicest varieties ... doz. 9/ to 18/-

EPACRIS.

Strong Plants, well set with flower buds ... each 1/6 to 2/6

EUCHARIS AMAZONICA.

It is easily cultivated, and can be had in bloom at almost any season ... each 1/6 and 2/6

ERICAS.

These most useful winter flowering plants are very fine this year, bushy and well set with flowers.

Assurgens, early, white, each 1/- to 1/6; doz. 10/6 to 15/-
Hyemalis, fine plants ... 1/6 to 2/6; ,, 15/ to 24/-
— **Superba**, large flowered, 1/6 to 2/6; ,, 15/ to 24/-
— **Alba**, pure white ... 1/6 to 2/6; ,, 15/ to 24/-
Gracilis, early, pink ... 1/- to 2/6; ,, 10/6 to 24/-
Wilmoreana, spring flowering 2/- to 3/6; ,, 21/ to 36/-
— **Cavendishii**, bright yel. 2/6 to 5/-; ,, 24/ to 50/-

GENISTA.

Fragrans, one of the most useful of early spring flowering plants ... each 1/ to 1/6; doz. 10/6 to 15/-

GERANIUMS.

Choicest Zonale varieties, specially prepared for winter flowering ... each 9d. to 1/6; doz. 6/ to 15/-

GLOXINIAS (Dry Bulbs).

Seedlings, mixed colours, from a magnificent collection, per doz. 9/-

PALMS.

The most hardy varieties for indoor cultivation and table decoration — well furnished plants of *Kentia Belmoreana* and *Fosteriana*, *Arecas*, *Chamaerops*, *Corypha*, *Latana*, &c.

Young Plants ... each 1/6 to 3/6
Larger Plants, well furnished ... each 5/ to 20/-

Plants for Forcing.

Specially Prepared and full of Flower Buds.

	Each
AMYGDALUS Persica fl. pl. (Double flowering Peach) ...	2/6 & 3/6
CRATÆGUS , double crimson Thorn ...	2/6 & 3/6
CYTISUS Andriana ...	1/ & 1/6
DEUTZIA gracilis , extra strong bushy plants for early bloom ...	1/6 to 2/6
— Lemoinei , flowers pure white, much larger than <i>Gracilis</i> ...	1/6 & 2/6
— crenata fl. pl. ...	1/6
FORSYTHIA suspensa ...	1/6
HYDRANGEA paniculata grandiflora , in pots ...	1/6 to 2/6
— Standards ...	2/6 to 3/6
— Hortensis ...	1/6 & 2/6

	Each

— Pissardii ...	1 6 to 3/6
ROBINIA hispida (Rose Acacia) ...	2/6
STAPHYLEA colchica , fine white ...	1/6 to 2/6
VIBURNUM opulus (Guelder Rose) ...	1/6 to 2/6
— Standards ...	2/6

If selection is left to us we make up liberally Assorted Collection of 25 Flowering and Foliage Plants, suitable for a cool conservatory, 31/6 and 42/, extra good value in each case being included.

ROSES IN POTS.

Grown expressly for forcing and greenhouse culture, and well established. All the most suitable varieties of Tea-Scented and Hybrid Perpetual kinds can be supplied in 5 in., 6 in., and 8 in. pots.
18s., 24s., to 36s. per doz.

EXTRA STRONG CLIMBING ROSES IN POTS.

Large plants with long shoots for immediate effect can be supplied at 2s. 6d., 3s. 6d., and 5s. each. With ordinary cultivation these will produce an abundance of bloom in the Conservatory during the early spring months.

OUR NEW ROSE CATALOGUE FOR AUTUMN 1912 WILL BE READY IN SEPTEMBER,
AND FORWARDED POST FREE ON APPLICATION.

RHODODENDRONS.

All the most suitable varieties for early forcing, and grown specially for flowering in pots, well set with buds, very fine 2s. 6d. to 3s. 6d.
Cunningham's White, fine each 2s. 6d. to 3s. 6d.
Helen Paul, soft peach, with the petals tipped and margined with pink, large truss freely produced on young plants; most distinct and good each 5s. and 7s. 6d.

Hybrids, set with buds, beautiful varieties each 1s. 6d. to 2s. 6d.

Pink Pearl, one of the finest introductions of late years, it produces enormous petals and truss, and is of clear flesh pink in colour,
according to size, each 3s. 6d., 5s., and 7s. 6d.

White Pearl, a charming companion to the above; large trusses of white flowers, faintly flushed with palest pink, foliage of a rich green; fine for forcing each 3/6, 5/6, and 7/6

Dwarf Calla Lily—"The Gem."

ARUM—The Lily of the Nile.

ÆTHIOPICA, the ordinary large Lily of the Nile... each 6d.; per doz. 5s.
Established plants in pots, each 1s. and 1s. 6d.

ELIOTTIANA, the new yellow Arum, flowers deep golden yellow, foliage dark green with white spots, one of the most attractive and distinct novelties introduced of late years.

1 Year Bulbs, for growing on, 1/ each.

Strong Flowering Roots, 2/ to 3/6 each.

MRS. ROOSEVELT, a handsome new variety, flowers of a beautiful delicate pale primrose, foliage rich deep green freely blotched silvery white each 1/6; per doz. 15/-

RICHARDIA hastata, fine yellow flowers, with black centre and white-spotted foliage, very handsome each 9d.; per doz. 7/6
— maculatum album, foliage beautifully spotted, makes a fine decorative plant and forces well, flowers produced in great profusion, creamy white, each 3d.; per doz. 2/6

"THE GEM."—The flowers are not more than half the size of the common variety, and therefore can be used with telling effect in bouquets. Height 18 inches... .. each 1/; per doz. 9s.

HARDY BORDER AND ROCK PLANTS.

We can supply Ornamental Foliage and Flowering Plants for conservatory decoration, and shall be pleased to send Priced List.

STRAWBERRY PLANTS.

GEO. COOLING & SONS devote special attention to the cultivation of Strawberry Plants. The Bath district being a large Strawberry producing centre, they have unusual opportunities for noting and selecting the best varieties. Strong runners are now ready of all the under-mentioned varieties. Plants established in pots can be supplied at an additional charge of 10s. 6d. per 100. Such are strongly recommended to produce a crop of fruit the first season. Full descriptions in our Fruit Tree Catalogue, which will be forwarded post free on application.
